

ABSTRACT OF THE DISCLOSURE**5 METHOD AND APPARATUS FOR MANAGING HISTORY LOGS IN A DATA
 PROCESSING SYSTEM**

 A method and apparatus for managing a history for a
browser in a data processing system. A history is
10 recorded for a browser. The history may be presented to
the user in a fashion similar to a video or slide show
presentation in which Web pages in the history are
sequentially presented in the order of visitation. The
presentation of the history may be manipulated through a
15 set of controls, such as a play button, a reverse button,
a fast forward button, and a stop button. Portions of the
history may be deleted or selectively exported for
analysis or later use.
